Research Profile

- My research focuses on uncertainty in machine learning, Bayesian deep learning, and domain generalization.
- Now I also work in AI for Science as an intern in Zhejiang Lab.
- Proficient in PyTorch, verl, and slime, with hands-on experience in large-scale pretraining, SFT and RL.
- Extensive project experience spanning model development, system integration, and deployment.

Education

Nankai University	Bachelor's degree; Gongneng Scholarship	2017–2021
Nankai University	Master's degree; Gongneng Scholarship, Zhou Enlai Scholarship, National Scholarship	2021–2024
Nankai University	Ph.D. studies; National Scholarship	2024–2028

Research & Engineering Projects

UAV Electro-Optical Imaging Teaching System:	Scene-generation subsystem.	2024
Maritime Optical Data Analysis System:	Confidence-assessment subsystem.	2024
Inertial Navigation High-Order Error Identification:	Project lead; big-data regression analysis.	2025
Virtual-Real Intelligent Traffic Simulation Platform:	Traffic-volume prediction and signal control.	2025

Research & Industry Experience

Tianrang — TRFold		2021
Yunqi Engineering Institute — Intelligent Transportation:	Train traffic prediction and signal-control models.	2024
Zhejiang Lab — AstrOne:	Lead SolarCLIP and SolarGPT development.	2024
Zhejiang Lab — 021 Chemical LLM:	Lead SFT and GRPO; design curriculum learning.	2025
Zhejiang Lab — 021 Mathematics LLM:	Build CPT data.	2025
Zhejiang Lab — 021 Code Agent:	Design stepwise verifiable RL rewards.	2026–Present
